Contact us. Readings and Links More InfoThe latest issue of TIME magazine (as well as its website) features a cover of Madonna by illustrator David Fincher. It's an excellent illustration, which I highly recommend. It's just a bit strange that Madonna would choose to use someone other than herself. Fincher's style is extremely familiar, and it's clear that the artists behind the image have been working with each other for at least years. As Madonna notes, the original story about the drawing is true to life, and she knows what she wants to convey. But by removing the nakedness, she seems to make the picture less accurate and more voyeuristic to an audience. It also suggests her desire to show off her nudeness. I haven't seen this on reddit yet, but, in terms of quality, this is a wonderful book. It is a bit complex at the beginning, and I know it will take you some time to fully appreciate the book. So if you want quick access to the first chapter which opens with the sentence, I highly recomend that you just jump on the email and read it. I recommend it. If you want a quick reference to what is going on in the books, I recommend the other books I've mentioned. There are a number of interesting ideas discussed in these books, but only the chapters that deal with one specific type of crime come to mind. The second volume of The Missing link up to the case of a girl missing for 30 days as a possible "incident" and that does not feature any major recurring characters. So as for the final product of the book, I like it better than either of these. The mystery of the girl's disappearance is brought to life by several of the real people who may have been involved with the case. You can expect to come away with something out of context, in different times and places. However, that could have been added to and perhaps enhanced over some other books I've seen on the topic. This is a rush transcript. Copy may not be in its final form.
